Professor Smith Here Next Friday Night

Professor Joseph F. Smith, head of the Drama Department of the University of Utah, will give one evening's lecture on our contemporary theatre and will review one of the most famous of the Broadway plays on Friday evening, September 11, in the Second Ward Chapel at 8:15.

Mr. Smith will be remembered for his stimulating discussions on the drama when he was here a year ago. After giving one lecture in Banff last summer, he was promptly engaged to return this summer as guest instructor in the Theatre Division of the Banff School of Fine Arts. He came to Banff directly from the University of Wisconsin, where he was teaching. The response to Prof. Smith's lectures in Banff was so great that he has been asked by the University of Alberta Department of Extension to return again next year as guest instructor.

Prof. Smith is recognized as one of the outstanding authorities on drama in America, and is himself a theatrical director

PROF. JOSEPH F. SMITH

and actor of prominence. He has a national reputation in the field of speech and the drama, having taught in many of the leading universities and educational institutions in the United States. He studied at King's College, University of London, and is the author of one of the largest selling books on speech in America.

While at Banff, Prof. Smith gave evening reviews of several well-known Broadway plays, including Maxwell Anderson's "Winterset", S. N. Behrman's "End of Summer", George Bernard Shaw's "St. Joan", Sidney Kingsley's "Dead End" and other dramas, exemplifying the finest in the theatre today. At the request of many local people who have heard him before, Mr. Smith will discuss the drama generally, the factors influencing our present dramatic vocation, and the future of the stage. The specific themes will be "War in Drama", and will include remarks about the influence of the stage toward pacifism. Of particular attention to three famous anti-war plays: Robert Sherwood's "Idiot's Delight", Irwin Shaw's "Enemy of the People", and R. C. Sherrill's "Journey's End." The first of these, "Idiot's Delight" won the Pulitzer Prize in Drama this year, and is still running on Broadway. "Journey's End" is one of the most powerful anti-war dramas ever written. "Journey's End" is itself a classic and Prof. Smith will spend the major part of the evening reviewing it in detail.

STORES WILL CLOSE MONDAY

Monday being a Statutory holiday, Labor Day, Sept. 7, all stores and offices will be closed, and the Wednesday half holiday for that week will not be observed.

Picture Butte News Of Local Interest

Church meetings are now being held in the old sugar factory office building which has been donated by the Rogers Co. to the L. D. S. Ward of Picture Butte.

The Misses Nova O'Brien and Olive Jensen are recent visitors in town.

Mr. and Mrs. Maor Garf (nee LaBarre Kimball) of Salt Lake City visited at the home of her aunt Mrs. Orgill last week. They were accompanied to Picture Butte by Mr. and Mrs. Walter Webster and Mr. and Mrs. Joseph Strong.

Mrs. Jack Simpson and Mrs. Dick O'Brien entertained for Mr. & Mrs. Frank Leavitt at the boarding house on Friday night. Mrs. Ivor Tucker and Mrs. Frank Kenney gave an afternoon tea for Mrs. Leavitt at the Kenney home on Tuesday. Friends of the Leavitt family greatly regret their leaving Picture Butte.

Mrs. George Atwood spent the past week in Lethbridge with her daughter Audrey who underwent a serious operation for mastoids.

Miss Ina Hawk is returning to her home in a few days.

Mrs. Ted Price and Mrs. Charlie Tawes spent Tuesday and Wednesday in town.

R. S. Orgill spent a couple of days in Calgary this week. He was accompanied by his daughter Melba.

NEWS NOTES

Shirley King who has spent the summer in Picture Butte was transferred this week to the local office of the Canadian Sugar Factories, Ltd.

Wednesday was cloudy and drizzly part of the day, a little rain falling at night. Thursday however, was bright and clear again.

With the cutting of interest to a maximum of three percent by legislation recently passed, municipalities borrowing from banks to finance will have to wait for the financial institutions to reconstruct the machinery on the basis of the new legislation.

Mr. Smith acted in, directed, and produced "Journey's End" in Salt Lake City some time ago, and it is his special request that he is giving this particular play here.

As Mr. Smith is anxious to correlate his lecture with the powerful anti-war drama over written "Journey's End" is itself a classic and Prof. Smith will spend the major part of the evening reviewing it in detail.

Irrigation Commission Here

Sitting under the Chairmanship of Justice A. F. Ewing, the recently appointed Commission to investigate and report on conditions in the irrigated districts of the Province held its first meeting in Raymond on Wednesday. About 70 farmers of Raymond, Welling, Magrath, Stirling and a carload from New Dayton and one from Taber were present to give their experiences and their problems to the body.

J. W. Evans, Secretary of the Raymond Irrigation district, and a man closely associated with the ups and downs of the district was the first one called. He recounted the building of the canal in 1902 and 1903 by the old A. R. and I. and the original water contracts arranged by them at \$1.00 per irrigable acre. In later years the C. P. R. took over the A. R. and I. but left the contract at \$1.00 per acre as formerly. In 1926 the Raymond Irrigation Co. was formed out of part of the area watered, and additional acreage put under irrigation by enlarging the main ditches and contracts under this new contract varied from \$1.80 to \$2.10 per acre, and most farmers felt this rate was a little too high but if the contracted flow of water could be delivered at all times

NEWS NOTES

Heavy rain fell in Nanton Wednesday morning while we were getting our light showers here. This moisture will help fall pastures and summer fallow.

J. Hollinger and family of Vernal, Utah, are in the district visiting with relatives particularly the Lybhart families. On Tuesday three carloads of people, including the Hollingers, visited the McIntyre ranch south of Magrath.

Town Council Discusses Franchise

The Town Council, with all that one was being studied but members present. There was not ready for announcement day night to discuss with Mr. Planch. Commercial Manager of the Calgary Power Co., Ltd. the rates and provisions of the proposed franchise between the Town and the Calgary Power Co. to supply the present franchise with the Canadian Utilities Ltd., which has two years to run, but which later company through in exchange with the Calgary Power Co. are relinquishing their holdings here.

A comparative list had been prepared of costs for the year 1935 under the present franchise of the domestic users of the Town, compared with the proposed rates of the Calgary Power Co., and this comparison also included Commercial and Power rates, showing a combined saving in all three fields of about \$1,800 under the new franchise based on 1935 consumption. This was about equally divided as between domestic use, Power and Commercial energy, but since 1935 a number of domestic users have been put on the Combination rate of the Utilities Ltd., and in these cases the rates average about the same as the proposed arrangement. There is no Combination rate with the Calgary Power, although Mr. Planch did state

724 Children Go Back To School

New Passion Play

TO BE SHOWN WITH MUSIC

"THE PASSION PLAY", or "LIFE OF CHRIST", is veritably a treasured heritage of the ages, to all Christian people, whose faith is anchored in the resurrection of Jesus of Nazareth. The dramatic versions, given periodically, in Europe, at Oberammergau, and Freiburg, are visited by hundreds of thousands of Christian people, from all sections of the World.

THE PUBLIC SCHOOL

In the Public School under the supervision of Principal J. O. Hicken 558 students were enrolled, included in this list being 99 beginners, the largest class of beginners ever enrolled. These students are divided into grades under 14 teachers as follows:

Miss Vanes, Grade VIII at the High School with 41 pupils. Principal J. O. Hicken, 42 pupils in Grade VII.

Kirtland G. Woolley, Grade VII and VIII with 40 pupils.

Miss Ruth Kimball, 42 students in Grade VI.

J. L. Gibb, Grade V, 40 pupils.

Miss Nonavce Watson, Grade V, 40 pupils.

Miss Velma Meldrum, 35 pupils in Grade IV.

Miss Velma Nalder, 37 pupils in Grade IV.

Miss Benah Page, Grade III with 38 students.

Miss Myrtle I. Johnson, 33 pupils in Grade III.

Miss Gladys James, Grade II with 43 students.

Miss Lenore Scoville, 17 in Grade I and 23 in Grade II total 40.

Miss Laura Riches, 42 Beginners in Grade I.

Miss Beth Walker, 40 Beginners in Grade I.

UNUSUAL SPIRITUAL VALUES

A very gratifying departure from the usual movie presentation in churches is the high spiritual level and atmosphere of meditation and prayer established and maintained throughout the entire program, which has been one of the fundamental objectives of the "National Bureau for Religious and Educational Films" under whose management this film is being presented.

This magnificent program in picture music, and address, is attracting immense audiences in many of the largest Churches in the United States and Canada, having been exhibited in over fifteen hundred of the principal Churches, Colleges, and Schools, to more than one-half million people, during the past three years. A capacity audience is anticipated here. The public is very cordially invited, and are urged to be in their seats early.

NEWS NOTES

Dr. and Mrs. Lecch returned Wednesday from an extended holiday in northern Alberta.

Red Deer's new Milk Condensery, erected by the South Alberta Dairy Pool will be officially Premier Wm. Aberhart, who will be accompanied on the trip by Hon. E. C. Manning, Minister of Trade and Industry.

There is going to be an all-season for a week or two days now prior to last night. It seems too bad that some of the definite could not have been arranged regarding additional storage south of town so that a start on this work could have been made. So far as we can learn the Town has been unable to receive any encouragement from either Province or Dominion on their plans.

WHAT CAN WE DO

ABOUT IT?

This year has witnessed a heavy loss in yield of all irrigated crops because of a shortage of water during the months of July and August when crops were needing so much water that simply could not be applied because it was not there. Where the blame rests for this condition no one would venture to say. The C. P. R. were taking all out of St. Mary's river that they were allowed, and more by far than those people living along the river wanted them to take, so they could hardly be blamed. In the latter part of August stockmen along the coulees east of New Dayton found themselves without water and through the kindness of the farmers along the ditch and the C.P.R., a good sized stream was turned down the coulee for several days to fill these people's ditches so that no stock losses resulted. At this time crops of all kinds were badly in need of water, and possibly some losses in yields resulted. At any rate what has been is past and can't be remedied.

The question now is, can anything be done to make the situation easier or next season? In the spring of the year there are weeks when the ditches are flowing full of water, and very few are irrigating. The same is true in the fall of the year. Beet crops may not be off the land in time to water. But hay crops and grain crops are nearly all off in time to give the land a good soaking, and summer-fallow can stand a soaking nearly any time. There are those who claim this is of no benefit, and yet in former years we have seen the benefit of sub soil moisture in our dry land farming, especially when a dry summer follows a wet fall and winter. Man, said this sum-

mer that had the subsoil been full of moisture for the grain fields that crops would have been able to withstand the drought without any where near as much loss as has resulted.

Efforts are being made to have storage reservoirs erected so that a reserve of water might be held for seasons of shortage. These however, are not at all definite, and in the meantime it appears that the best safeguard is to farm each year as though each succeeding year was going to be a dry one. With this in mind fall irrigation would suggest itself as a very valuable and worthwhile practice, and to keep the water on the land as long in the fall and as early in the spring as it can be done in reason.

DISFURNISHED CITIZENS

There are a few distinguished citizens in Raymond whose life and work are well known to most of us. However there is someone among us whose history and accomplishments are worthy of note who has never been under the spotlight as they should have been.

Possibly YOU would be willing to be a reporter for the Recorder to the extent of giving us the needed information for a writeup.

You probably recall the story of the little boy who had a banana hen and who thought she should lay larger eggs. He finally hung a large goose egg in front of her nest with a sign underneath: "Keep your eye on this and do your best."

Should we gain our co-operation in giving us the history of accomplishments of one or more of your neighbors, it would help us greatly in our contemplated "May We Present" column. Furthermore, the data you give may be the means of inspiring some young person to try a little harder to overcome his or her particular handicaps.

"Lives of great men all remind us
We may make our lives sublime
And departing leave behind us
Footprints on the sands of time."

Practically everyone in Raymond has something of outstanding worth which he can contribute to help the rest of us

NEWS NOTES

Threshing is just about finished, most of the machines having piled up the early part of the week.

Third cutting of alfalfa is going into the stack in most fields now and it looks like a good crop.

H. McKean, local agent of the Citizens Lumber Co. is building another room onto his house.

CHRISTIAN SCIENCE

At all Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Man." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "And God said, Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. So God created man in his own image, in the image of God created he him; male and female created he them." (Genesis 1:26-27). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 64): "Man reflects infinite Truth, Life and Love. The nature of man, thus understood, includes all that is implied by the terms 'image' and 'likeness' as used in Scripture."

FALL TREATMENT OF
SUMMER-FALLOW FOR SOIL
DRIFT CONTROL

The fall and winter period is often a time when serious soil drifting is experienced in the "chinook" belt of southern Alberta. It is, therefore, important to give careful consideration to the fall treatment of summer-fallow. A situation that is often met is that of fallows that are supporting some late weed growth especially where no cultivating has been done during the period of flight of cut worm moths—in August and early September. Very frequently inquiries are received at the station as to the advisability of cultivating such fields in the last half of September to destroy this weed growth. Frost of sufficient severity to check this growth are usually experienced in September and so it is doubtful if very much growth takes place and moisture loss is experienced from these fall weeds, so in the majority of cases it may be best to leave annual weeds as a fall cover crop. This is true on light soil but especially so on heavy flaky clay where other types of control are quite difficult and especially if a good trash cover has not been maintained. In any event, there seems to be little gained by fall cultivation to destroy annual weeds.

Fall listing is a good type of protection. Loam soils that are not sufficiently protected by trash may be materially improv-

ed by ridging with the duck-foot cultivator, but to be effective the duck feet should be run deeply enough to bring up fresh or slightly lumpy soil. A deeper furrow listing furnishes greater protection, however, and this can be done quite easily by placing three listing shovels on the ordinary sized cultivator from which the duck feet have been removed. The land can be ridged with this implement very effectively with furrows about 7 inches deep and approximately 4 feet apart. This method of listing requires the same amount of power as the ordinary duck foot cultivating and is usually quite effective on loam soils and helps any soil materially. Fall listing may be especially desirable on and where black summer fallows have been conducted to destroy perennial weeds. Fall ploughing is also resorted to by some farmers to protect this type of fallow, but it is more expensive than the listing.

Sandy soils and heavy clay of course, furnish the greatest problem as it is extremely difficult to provide any amount of lumpy structure or rough surface that will not break down under severe drift conditions. If straw is available for the purpose it may be quite desirable to scatter a light cover of straw over any parts of the field that seem to be in danger of drifting. A load of straw on each two or three acres may save the field and if so, it is surely worth the effort and cost.

What The Alberta House Did At This Session

EDMONTON, Sept. 2—Major legislation considered at the special session of the Alberta Legislature follows:

PASSED

ALBERTA CREDIT HOUSE ACT—Provides for implementation of whole Social Credit plan.

DEBT ADJUSTMENT ACT AMENDMENT—Extends provisions of act four years to July 1, 1936; makes impossible appeals from decisions of debt adjustment board.

REDUCTION AND SETTLEMENT OF DEBTS ACT—All private debts contracted prior to July 1, 1932, reduced by total payments, on principle or interest, made since that date; these debts to be paid in ten annual instalments without interest; maximum interest rate collectable on debts contracted cent.

MUNICIPALITIES' SECURITIES INTEREST ACT—Prevents municipalities collecting taxes to pay more than three per cent interest on securities.

PROVINCIAL CERTIFICATES ACT—Validates issue of certificates and authorizes Edmonton to enter into an agreement accepting certificates.

TRADE AND INDUSTRY ACT—Provides for formation of board to investigate price spreads and also fix prices.

HOURS OF LABOR ACT—Sets maximum 48 hour work week for females and 54 hour work week for males; provides employers must allow employees at least 24 consecutive hours of rest in every consecutive period of seven days.

JUDICATURE ACT AMENDMENT ACT—Prevents and legal action against government or any member of the government.

DEFEATED

SAVINGS CERTIFICATES ACT AMENDMENT—To make negotiable \$9,000,000 worth of provincial savings certificates now non transferable and non negotiable.

JUDICATURE ACT AMENDMENT—Providing crown may sue or be sued in any courts in Alberta.

The prison governor was noted for his innumerable reforms. He was particularly keen on the sports side of the prison routine.

Yet in spite of all these reforms the prisoners were still dissatisfied.

One day he addressed them in the main hall.

"I've given you talkies, baseball, football, and various other entertainments, and still you grouse," he said, "What else do you want?"

"How about a cross country run?" chorused the prisoners.

Mrs. Mary Hoyt Honored

A few friends and relatives met at the home of Mrs. Mark Collett to do honor to Aunt Mary Hoyt who on September 2nd had reached her 83rd birthday.

Congratulations are due this fine lady who during her long life has been a friend to all. "Aunt Meg" as she is affectionately known was born in Nephi Utah of pioneer parents. Her younger life was spent in educational pursuit at Nephi and later at Provo under the leadership of Karl G. Maser. She also attended the University of Utah where she prepared herself to become a teacher. She taught school in Levan Utah, and many fine men and women can look back upon her teaching with happiness. The late Eliza Whitbeck was one of her students.

In 1913, she came to Canada to live and has spent a great number of years both here and in Utah as a nurse administering to the sick. While residing

in Utah she was instrumental in assisting many young people thru school. She has mothered more than one family not her own. "Aunt Meg" has a remarkable memory and a well stored mind. She is the family historian and has traveled to many points of interest; so her friends always find her entertaining to visit.

On Wednesday afternoon her nieces Mrs. Florell Palmer and Honnie Nalder, also May Tolstrup, Mrs. S. B. Card and Mrs. Collett were present to do her honor. Each guest presented a lovely bouquet of flowers together with other gifts, and May Tolstrup made the birthday cake. A delicious lunch was served by Mrs. Collett at whose home "Aunt Meg" resides, and a very pleasant afternoon was spent by all present.

Letters of congratulation and gifts were received from her family in Picture Butte and from nieces in Utah & Oregon.

News Notes

Mrs. L. D. King was stricken with a bleeding of the nose last week end, and it was about 24 hours before the bleeding could be stopped. She is getting along fine now.

Mr. and Mrs. Frank Leavitt and family are back in Raymond and the children started school on Monday. Frank is operating the crane again at the local plant.

Following the Hancock reunion of a week ago, three car loads of the relatives left Monday morning, all three through Carway, for different points in the Western States. Mr. and Mrs. Fred Curtis and family left for Paines, where Fred teaches school. Leppard Barry and party left for Portland, Oregon, and McGrath Merrill and family left for Legrande, Oregon.

A Bee-Hive Institute for the training of Bee Keepers will be conducted in Cardston on Sept. 12 for the benefit of Bee Keepers in the Taylor and Alberta Stakes. This will be under the direction of the State Bee Keepers of Raymond and Cardston.

Professor and Mrs. Joseph F. Smith, Mr. Eugene T. Pingree, of Salt Lake City, and Miss Evelyn Iverson of Washington, D. C. are the guests of Mr. and Mrs. Ray Knight. Prof. and Mrs. Smith will remain in Raymond until Sept. 12, when they will leave from here for Madison, Wisconsin, where Prof. Smith will be at the University of Wisconsin. Miss Iverson will leave Sunday for Utah and later for her home in Washington.

Canada's Newest Trains

Keeping thoroughly abreast of the times, the Canadian Pacific Railway is putting into commission four semi-streamlined lightweight trains which will operate on the day runs between Montreal and Quebec, Toronto and Detroit, and Edmonton and Calgary. At present these deluxe trains are on tour for public inspection in Ontario, Quebec, and Western Canada, where they

will be seen by many thousands of residents.

Economical in operation, and approximately only half the weight of a regular standard train of the same equipment, the trains, which consist of the Jubilee 4-4-4 type locomotive (3000 class) mail and express car, baggage and buffet car and two first class coaches, mark a distinct

forward movement in modern transportation in Canada. Thoroughly air-conditioned the cars at all times are supplied with clean fresh air and will be found comfortably warm in winter, and pleasantly cool in summer. In the pictures above are shown the new train, and parts of the first class coach, buffet car and ladies lounge.
